

Music

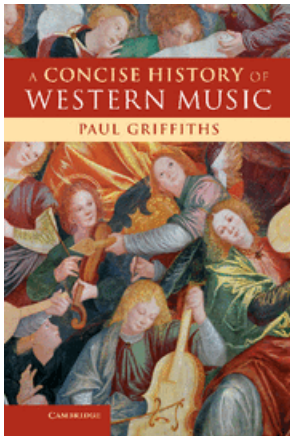

A Concise History of Western Music

Paul Griffiths

Paul Griffiths shows how music has changed through the centuries, and suggests how that change mirrors development in the human notion of time, from the eternity of heaven to the computer's microsecond. An essential read for students, teachers and classical music lovers alike.

Language and Society in the Greek and Roman Worlds

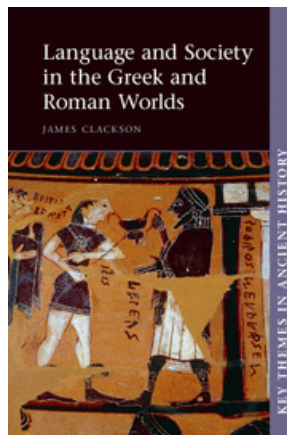

James Clackson
University of Cambridge

Translated examples from Greek, Latin and other languages give an accessible account for students and general readers of how language illuminates topics such as ethnicity, social mobility, religion, gender and sexuality in the ancient world. Questions addressed include the rise and fall of languages, obscenity, and what language Jesus spoke.

The Language Myth Why Language Is Not an Instinct

Vyvyan Evans
Bangor University

Language is central to our lives, the cultural tool that arguably sets us apart from other species. Some scientists have argued that language is innate, a type of unique human 'instinct' pre-programmed in us from birth. In this book, Evans argues that this received wisdom is, in fact, a myth.

American and British English Divided by a Common Language?

Paul Baker
Lancaster University

Is British English becoming more like American English, and if so, why, and in what ways? Paul Baker compares eight large sets of American and British English from the 1930s, 1960s, 1990s and 2000s, using a mixture of computer and human analysis to identify how both varieties are changing over time.

Philosophy

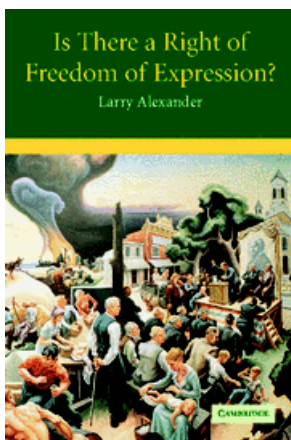

Is There a Right of Freedom of Expression?

Larry Alexander
University of San Diego

In this provocative book, Alexander offers a sceptical appraisal of the claim that freedom of expression is a human right. He examines the various contexts in which a right to freedom of expression might be asserted and concludes that such a right cannot be supported in any of these contexts.

Replacing GDP by 2030

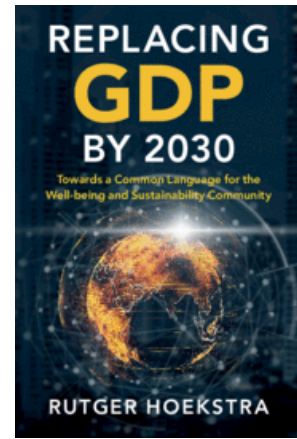

Towards a Common Language for the Well-being and Sustainability Community

Rutger Hoekstra

Gross domestic product (GDP) is the world's dominant indicator, yet it is well known that it is not a good measure of society's wellbeing or sustainability. For decades, beyond-GDP alternatives have been conceived but with negligible impact. Hoekstra proposes a new strategy for the beyond-GDP community which aims to replace the GDP paradigm by 2030.

GBP 19.99Paperback 978-1-108-70578-3 0pp

History - cross discipline

Intellectual Curiosity and the Scientific Revolution

A Global Perspective

Toby E. Huff
University of Massachusetts, Dartmouth

This study begins with the Dutch-invented telescope of 1608 and then casts Galileo's discoveries with it into a global framework. Although the telescope was soon transmitted to China, Mughal India, and the Ottoman Empire, those civilizations did not respond as Europeans did to the new instrument. These and subsequent unique developments in modern science, technology, and educational practice suggest why the West experienced a singular scientific and economic ascendancy of at least four centuries.
